

# Directory of Service Providers Offering Maintenance and Repair of High-End Testing Equipment in the East African Community (EAC)

**Version 1.0**

**Date: 28 April 2026**

**Validated by EAC Testing Technical Subcommittee 31st meeting**

## About this Directory

This Directory provides information on maintenance and repair services (MRSs) for high-end testing equipment available in the East African Community (EAC). It was compiled by the International Trade Centre (ITC) within the framework of the EU-funded MARKUP II project based on information submitted by the listed service providers.

The Directory—and the accompanying list of high-end equipment—is primarily intended for food testing laboratories. However, other laboratories may also find it useful, particularly for understanding the types of available MRSs and the providers' status as official representatives of equipment manufacturers.

In this Directory, among others, the following information may be found:

- Maintenance and repair service (MRS) providers by EAC Member
- Equipment manufacturer(s) that each MRS provider officially represents
- Type(s) of high-end equipment that each MRS provider covers in their services
- Contact information of each MRS providers for further inquiry

**About MARKUP II project:** A regional development initiative that promotes economic growth in the East African Community (EAC) through private sector development and export promotion. Jointly designed by the European Union (EU), the EAC Secretariat, relevant ministries, and government departments from the EAC partner states, Standard/quality organizations and public institutions, business support organisations and East Africa Business Council (EABC), MARKUP II is implemented by the International Trade Centre (ITC) and funded by the EU under the 11th European Development Fund.

## Disclaimer

This directory is provided for information purposes only. The information contained in this directory is supplied by the listed maintenance and repair service providers and does not constitute any form of endorsement, recommendation, or certification by ITC.
