Dear Colleagues and Partners

April 2021

MARKUP Newsletter - January to March 2021

This latest edition of the MARKUP newsletter leads us into year 2 of working under COVID-19 conditions and restrictions. In the meantime, we have all become used to the technicalities of virtual meetings and have learned to keep them shorter and more to the point. However, we probably all sorely miss direct face-to-face meetings where networking happens on so many more levels.

The MARKUP teams have been able to conduct most trainings and workshops successfully through online meetings, including large events such as the EAC Invest event, a fully virtual event with high-ranking participation that stretched over four days.

The Tanzania National Stakeholders Consultative Meeting on Non-Tariff Measures was another successful large-scale event that was successfully carried out in a hybrid format of virtual and physical engagement.

The EAC Codex Forum, with participants from all EAC Partner States, had its 2nd Extra-Ordinary Meeting from 23rd to 26th March 2021 with national teams connecting virtually.

That said, some events cannot be virtual – just think of training in sensory skills and tasting. We are pleased that MARKUP experts could provide on-site coaching for farmers and manufacturers while fully observing Covid-19 measures. There is no denying the impact of the pandemic not only on our work, but also on the lives of people all over the world. Still, we continue to tirelessly explore ways to support SMEs and policy makers to improve market access in this greatly changed business environment.

As we go forward, we’ll be sure to keep you updated on the many exciting events happening in MARKUP, and we always value your ideas and feedback through our social media platforms on Facebook and Twitter.

Training

Private voluntary standards and certifications: the importance of a comprehensive Internal Management System

Certifications are becoming a pre-requisite to access European markets. In order to be eligible for most certification schemes, companies will need to have a specific Internal Management System (IMS), which sets a standard quality of operations and working procedures. As companies often aim at acquiring multiple certifications, adopting an IMS for each can become a real headache... Read more...
**EU Market Requirements and Opportunities for Tanzanian Exporters**
The International Trade Centre organised a four-day webinar series that addressed the requirements, opportunities and sustainability trends for SMEs to access the European market. The webinar series was organised for Tanzanian SMEs active in the avocado...
